

AK DURABLE SUPPLY CO.

2025-2026
PRODUCT GUIDE

Human Centered:

A diverse collective of watermen from around the world.

Evolve & Revolve:

Built to unite the body and the elements until we work as one.

Utilitarian:

A concise collection of high performance and durable products.

MULTISPORT WATERMAN BRAND

Our mission is to create inspiration and stoked watermen around the world.
This drives us to build products that become an extension of ourselves,
progressively integrating the body and the elements, until we work as one.

We do this by creating groundbreaking and durable products for a
diverse collective of watermen looking to make a positive impact in the
communities where we live and play.

We see a world where everybody is a waterman, united by
the pleasure of connecting with the natural environment.

**AK is a watersports brand from Cape Town, crafting high
performance technical components, hydrofoils, and
accessories built for watermen around the world.**

NEW

ARCADE - DURATECH

Durable composite shell.
Reinforced foil connection.
Carbon rails & reinforcing.

ARCADE DURATECH CONSTRUCTION OVERVIEW

Covering a high density fused EPS core, the durable composite shell optimizes durability while minimizing weight.

The foil connection features a heavy-duty high-density load plate, which carries the load of the foil

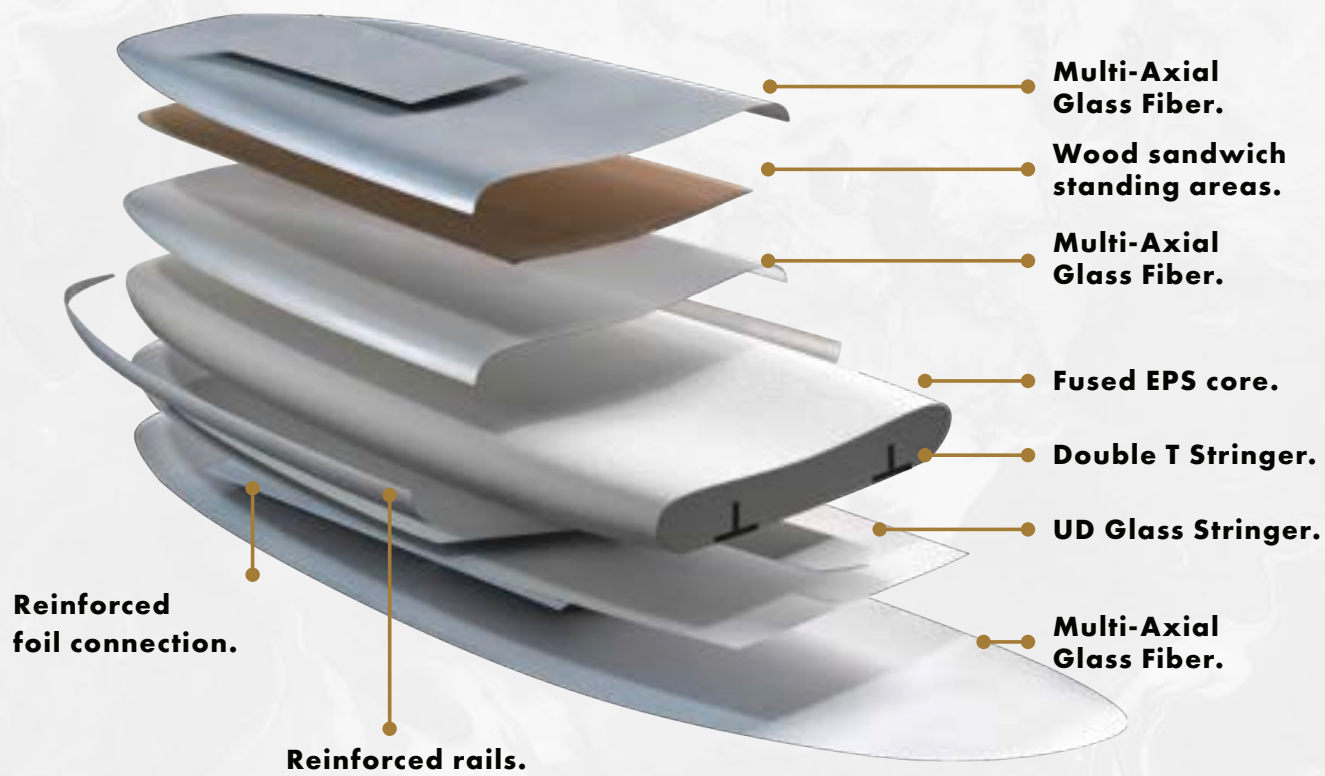

and connects it to the top deck, for a direct connection to the rider. Carbon reinforcing on the top and bottom deck, along with UD carbon rails, create an ultra-stiff and lightweight platform, perfect for multi-sport use.

Featured in the Arcade.

NEW - SHIPPING AUGUST 2025

PHAZER - DURATECH

Durable composite shell & lightweight core.
Wood sandwich standing area.
Heavy duty foil connection.

PHAZER DURATECH CONSTRUCTION OVERVIEW

Covering an ultra-lightweight fused EPS core, the durable composite shell optimizes durability while minimizing weight.

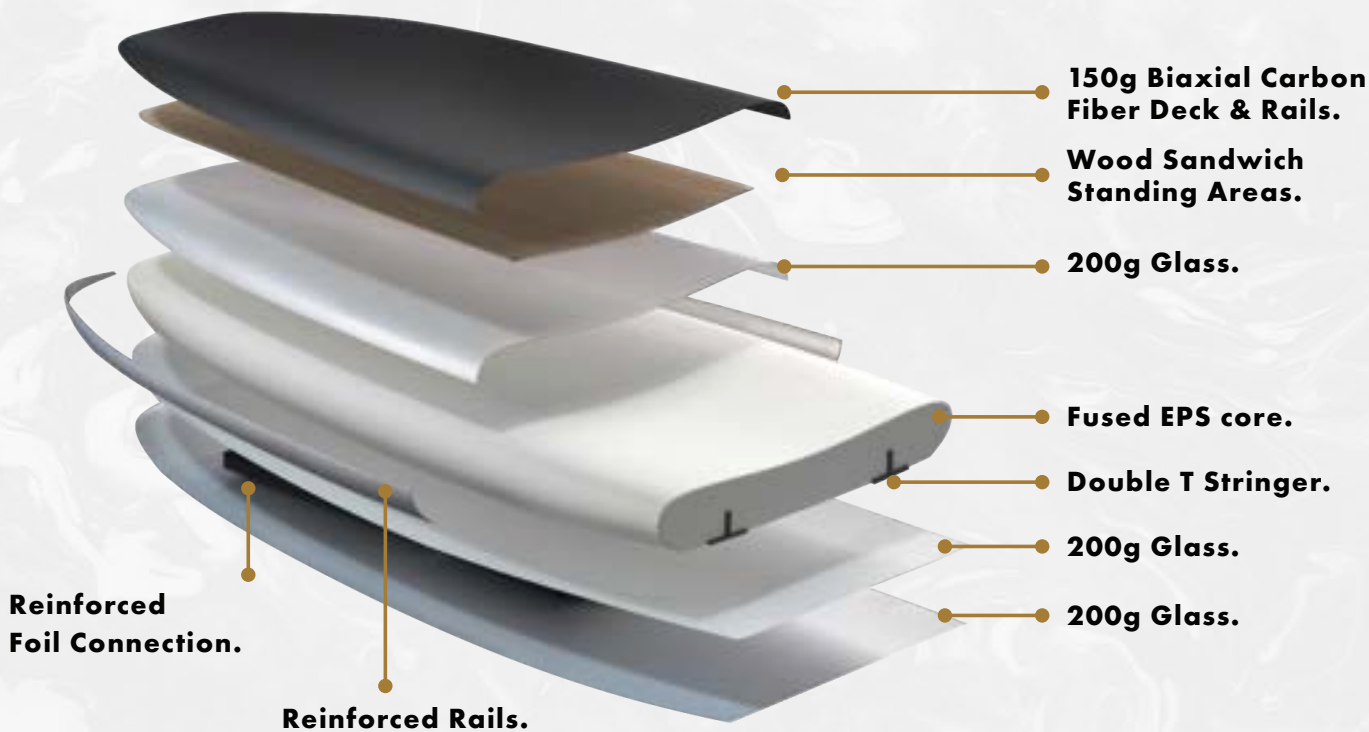

The wood sandwich standing area creates additional strength in the standing area and works together with the T- Stringers on the bottom deck to enhance stiffness.

The foil connection features a heavy duty high-density load plate, which carries the load of the foil and connects it to the top deck for a direct connection between the foil and the rider.

Featured in the Phazer Duratech.

ACTIVE CARBON

Active Carbon deck & lightweight core.
Wood sandwich standing areas.
Heavy-duty foil connection.

ACTIVE CARBON CONSTRUCTION OVERVIEW

Covering a lightweight fused EPS core, the Active Carbon construction creates an extremely strong and stiff standing area.

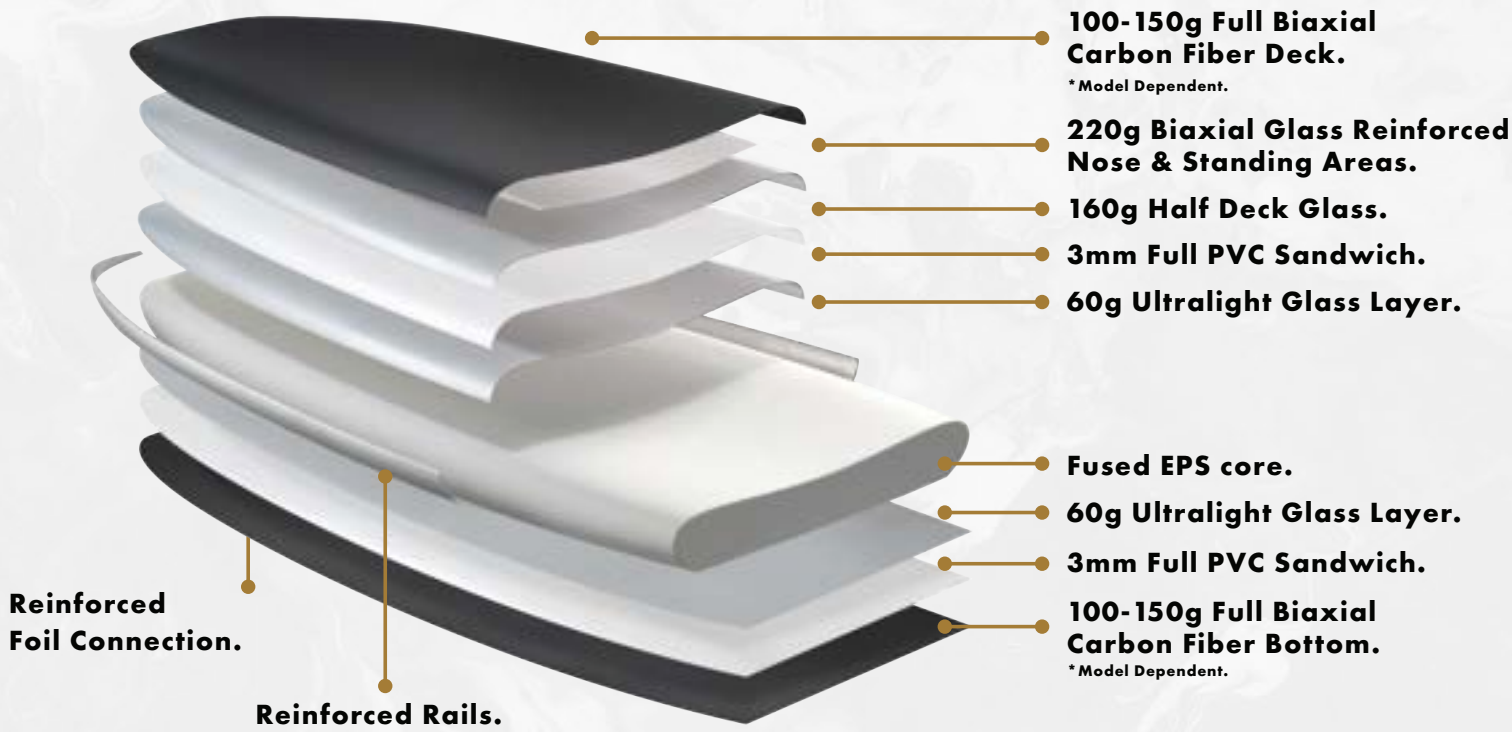

The 45-degree carbon orientation generates active torsional reflex, for immediate response to rider input.

Featured in the Phazer & Nomad.

The heavy duty foil connection carries the load of the foil and provides direct feedback from the foil to the rider.

CARBON PLUS

Ultralight full Carbon Plus deck & bottom.
PVC sandwich construction & lightweight core.
Heavy-duty foil connection.

CARBON PLUS CONSTRUCTION OVERVIEW

The Carbon Plus construction features a full carbon sandwich construction on both the top and the bottom of the board.

This technology features a glass layer around the lightweight core, fusing the high-density foam layer

on the top and bottom of the board. This is then finished with a full carbon layer, top and bottom. Our biaxial carbon fibre has been optimized to ensure the best combination of responsiveness, strength, and weight reduction.

Featured in the Compact & Nomad LS.

NEW - SHIPPING JUNE 2025

ARCADE - DURATECH

v2

Versatile pump & tow foilboard for riding with or without straps.

Durable construction with carbon rail & foil box reinforcing.

Concave deck with beveled rails & convex nose.

Covering an ultra-lightweight fused EPS core, the durable composite shell optimizes durability while minimizing weight. The foil connection features a heavy-duty high-density load plate, which carries the load of the foil and connects it to the top deck, for a direct connection to

the rider. Carbon reinforcing on the top and bottom deck, along with UD carbon rails, creates an ultra-stiff and lightweight platform, perfect for multi-sport use.

NEW SIZES - SHIPPING JUNE 2025

NOMAD - ACTIVE CARBON

v2

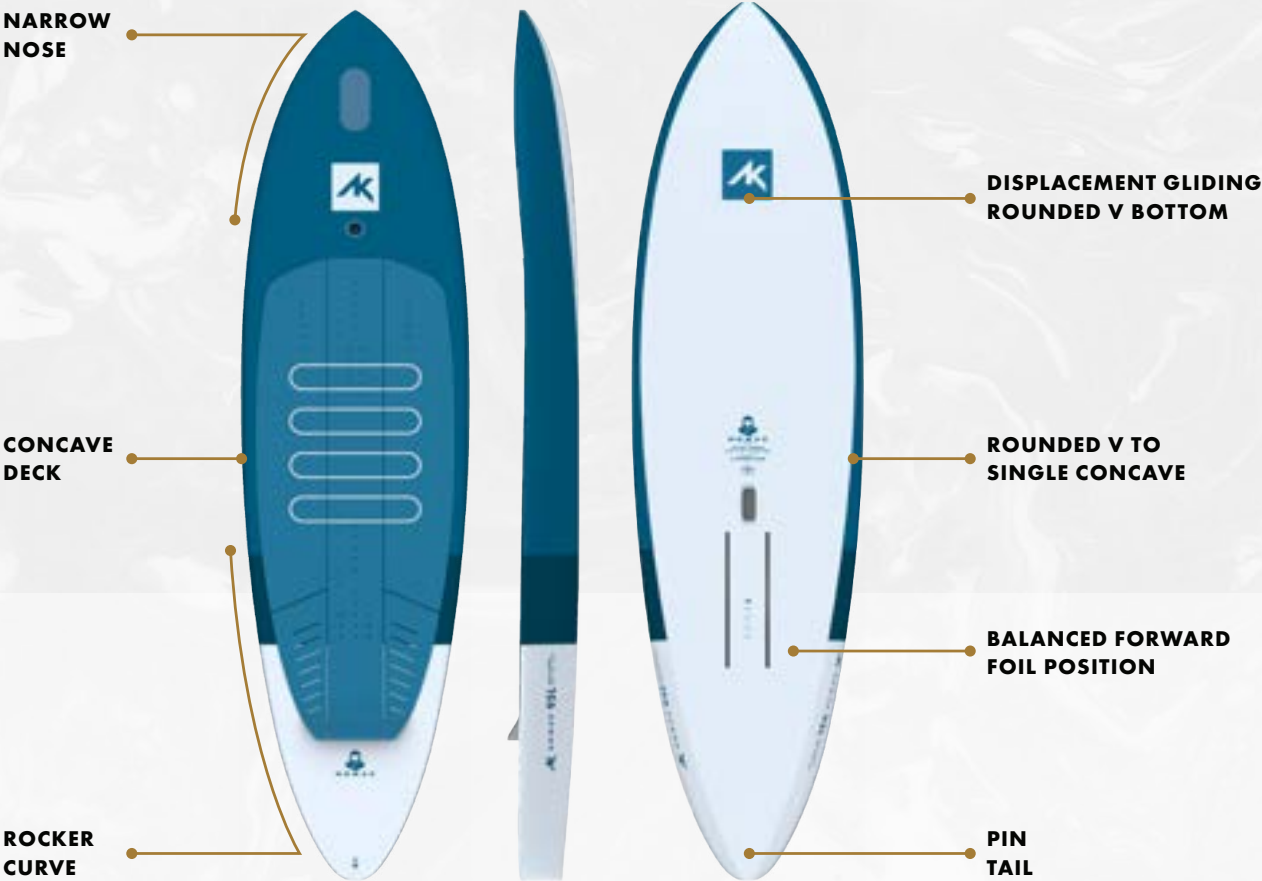

- Lightwind wingboard, surf & downwind foilboard.
- Intuitive glide & maneuverability for crossover riding.
- Lightweight & durable Active Carbon construction.

The Nomad foilboard is an intuitive and stable lightwind and downwind crossover board with effortless gliding capabilities. Perfect for catching long drawn out waves, downwinding, or getting up on the foil in the lightest wind with your wing.

KEY UPDATES

The new 65L and 85L added to the range provide greater choice in the mid-sizes due to their popularity as medium wind wingboards.

With its optimized length and width, the Nomad features a parallel outline, volume distributed for flight, and a forward foil position that will allow you to keep the same stance as you paddle for take-off, and get up on the foil.

AVAILABLE IN			
46L	5'5" x 19" x 3.6"		
55L	5'8" x 19.25" x 4"		
NEW 65L	5'11" x 19.5" x 4.4"	NEW 85L	6'5" x 20.5" x 5.1"

		135L	7'8" x 23" x 5.9"

NEW - SHIPPING JUNE 2025

NOMAD LS - CARBON PLUS

v3

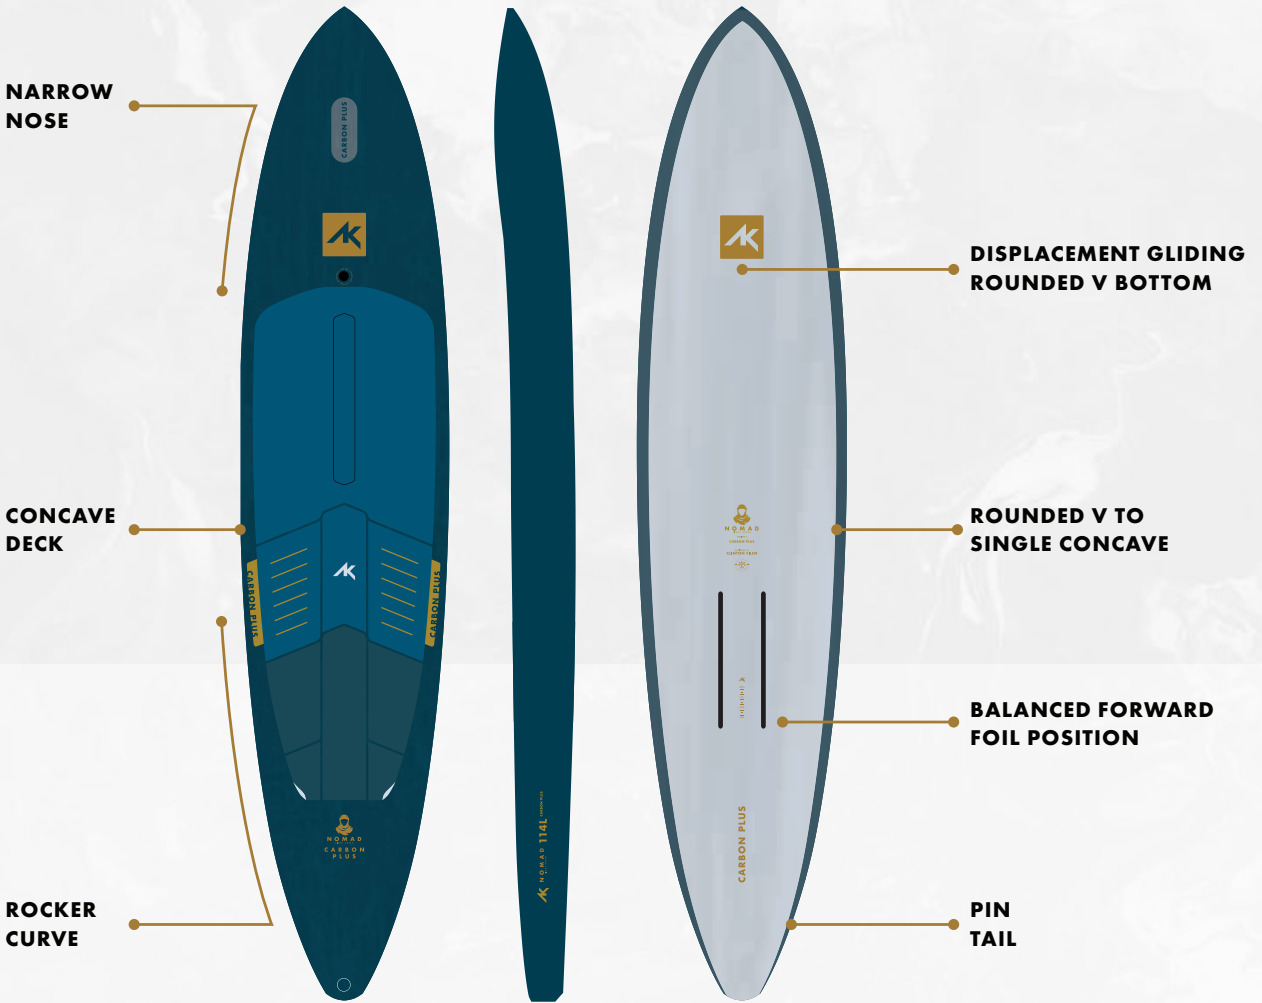

- Lightwind wingboard / downwind & surf SUP foilboard.
- Infinite glide & optimized maneuverability.
- Lightweight & durable Carbon Plus construction.

The Nomad LS foilboard is an intuitive and stable lightwind and downwind crossover board with effortless gliding capabilities. Perfect for catching long drawn out waves, downwinding, or getting up on the foil in the lightest wind with your wing.

KEY UPDATES

The Nomad LS features a further reduction in width over the original Nomad Carbon Plus. The LS (Light Speed) shape is as slippery as a greased eel, but still versatile enough to downwind, wave ride, or wing in light wind.

With its optimized length and width, the Nomad LS features a parallel outline, volume distributed for flight, and a forward foil position that will allow you to keep the same stance as you paddle for take-off and get up on the foil.

AVAILABLE IN	
98L	7'0" x 18" x 5.9"
114L	7'6" x 19" x 6.1"
126L	8'0" x 20" x 6.1"

HYDROFOILS

MODULAR HYDROFOIL PERFORMANCE

The modular foil platform considers the evolution in foiling to allow riders to customize their setup.

From the very first ride and lower speed performance to the most technical riding abilities with longer masts and higher speed wings, the modular foil platform is designed to meet the needs of riders at every level across different sports.

BASE PLATE & SHIM

0 Degree base plate and 1.5 Degree shim option to suit surf and kite use respectively.

G 10 STABILIZERS

Trimable stabilizers, ranging from the 200 - 220 Mustache, 160 - 220 Arc Down, and the 160 - 180 Rhythm.

REAR FUSELAGES

Available in 26.5, 31.5 and 36.5cm.

TAPERLOCK MASTS

Aluminum Foil Drive:	80cm
Carbon Foil Drive:	82cm
Carbon Plus:	78 - 98cm
Aluminum:	50 - 95cm

MONOCOQUE STABILIZERS

Monocoque Carbon stabilizers ranging from 180 - 200 in the Arc and 140 - 160 in the Rhythm.

FRONT WINGS

Ranging from 650 to the 2050cm², the wing range will take you from light wind kiting progression to performance wave riding, and winging.

BASE PLATE

The streamlined 0 Degree aluminum base plate absolutely minimizes drag when you're getting going or touching down, while creating a solid connection to the mast via the M8 double bolt connection. 12mm slots enable micro trim adjustment when not being used in a track system, while the open ends make the plate much quicker and easier to fit when being used in a track system.

G 10 STABILIZERS

MUSTACHE

Ranging in size from 200 - 220, the trimmable G10 mustache rear wings provide directional stability.

ARC DOWN

The G10 160, 180, 200, and 220 arc down stabilizers are ideal for highly efficient pump and glide, high speed, and pivoting turns. The G10 construction provides strength, stiffness, and durability.

RHYTHM

The G10 160 and 180 Rhythm stabilizers are ideal for speed and glide efficiency. Generating slightly more lift than the Arc Down, the Rhythm stabilizer will allow you to use a smaller size tail for less drag. The thinner profile allows some flex for springback when pumping.

MONOCOQUE STABILIZERS

For the ultimate efficiency, the monocoque carbon stabilizers will have you carving smoothly and gliding for longer. By integrating the tail and fuselage, the monocoque stabilizers pair perfectly with the blended front wing for an almost seamless foil from front to back. Minimizing obtrusive bolts and adjustment points, these tails have been optimized for performance.

REAR FUSELAGES

The hydrofoil range features a structurally integrated blended front wing and fuselage, resulting in unparalleled hydrodynamic performance. The fluid dynamics of the blended wing construction result in a much stiffer and efficient structure, which will have you hydrofoiling with intuitive ease. These integrated wings are paired with rear fuselages, available in 26.5, 31.5, and 36.5cm lengths.

REVERSIBLE REAR FUSELAGES

Should the rider need to mount an aftermarket tail, the reversible fuselage is compatible with our AK foil range. With the symmetrical connection, this fuselage can be flipped from top mount to bottom mount, depending on the specific requirement needed for the stabilizer used. Available in 31.5 & 36.5cm.

MASTS

ALUMINUM - TAPERLOCK

The bombproof aluminum masts are available in 5 sizes: 50 / 60 / 70 / 80 / 95cm.

CARBON PLUS AEROCORE - TAPERLOCK

The high modulus lightweight carbon plus Aerocore masts are available in 3 sizes: 78 / 85 / 98cm.

CARBON PLUS STIFFNESS RATING: **10/10**

NEW SIZES - SHIPPING JUNE 2025

PLASMA

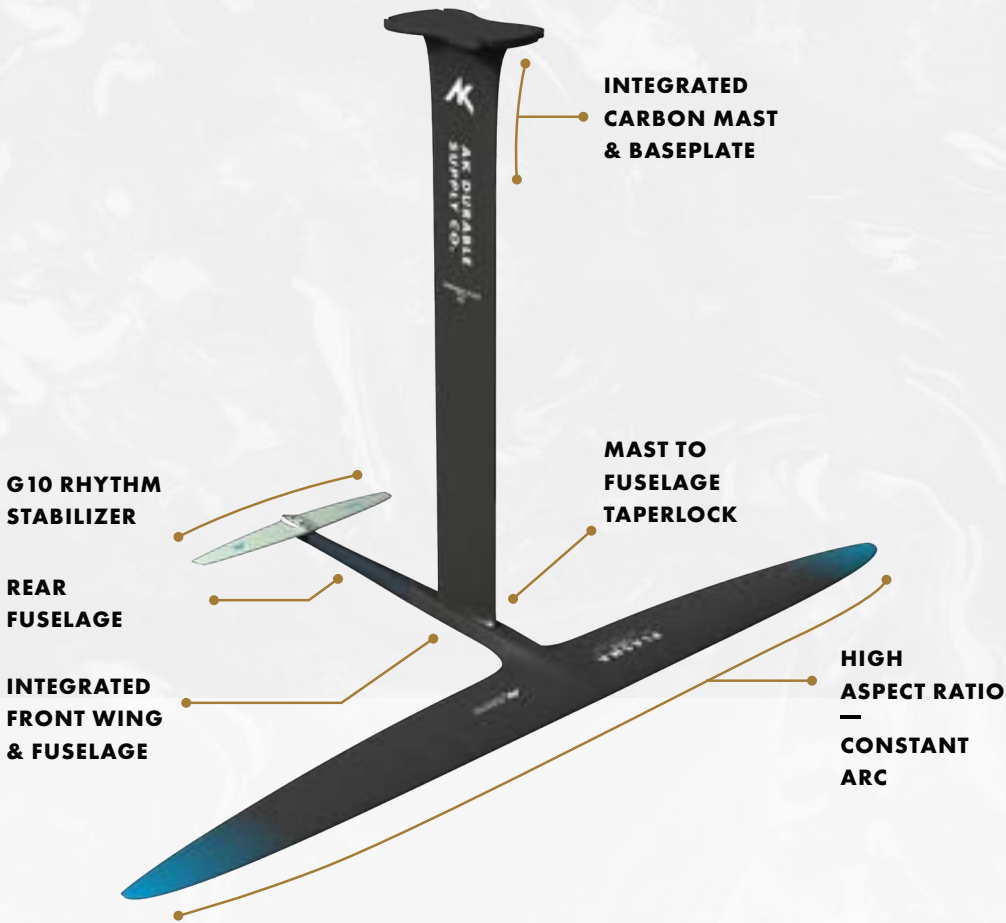

High Aspect Foil Series
v2 & v3 Featuring TaperLock

- High aspect foil for pump, glide & higher speed.
- Rhythm stabilizer for efficiency & pivoting turns.
- Modular aluminum rear fuselage.

The Plasma was developed for chasing the fastest ocean swells or pumping with infinite glide to deliver an extremely high-performance ride, without compromise.

KEY UPDATES

The 700cm² v2 has been added to the range, along with the all-new v3 Ultra High Aspect Plasma front wings available in 1600 and 2050cm².

NEW - SHIPPING JUNE 2025

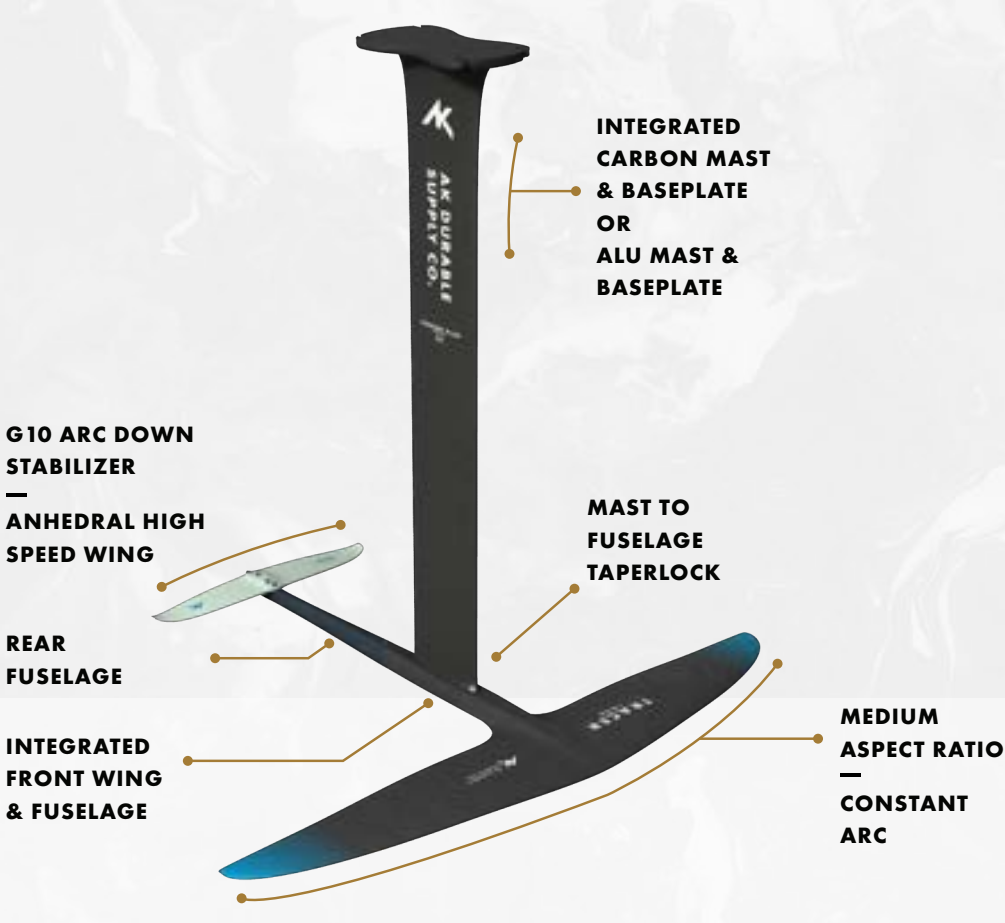

TRACER

Medium Aspect Foil Series
v3 Featuring TaperLock

- Medium aspect ratio for ease of use & maneuverability.
- Arc Down stabilizer for directional stability & ease of use.
- Versatile performance & high-speed control.

For riders looking for the perfect balance between performance, ease of use, and the ultimate maneuverability, the Tracer Hydrofoil Series has been

completely redesigned to have you carving the cleanest lines with intuitive ease.

TREK

Variable Aspect Foil Series
v2 Featuring TaperLock

Variable aspect ratio for ease of use.
Perfect for entry-level foiling & progression.
Smooth lift & stability at speed.

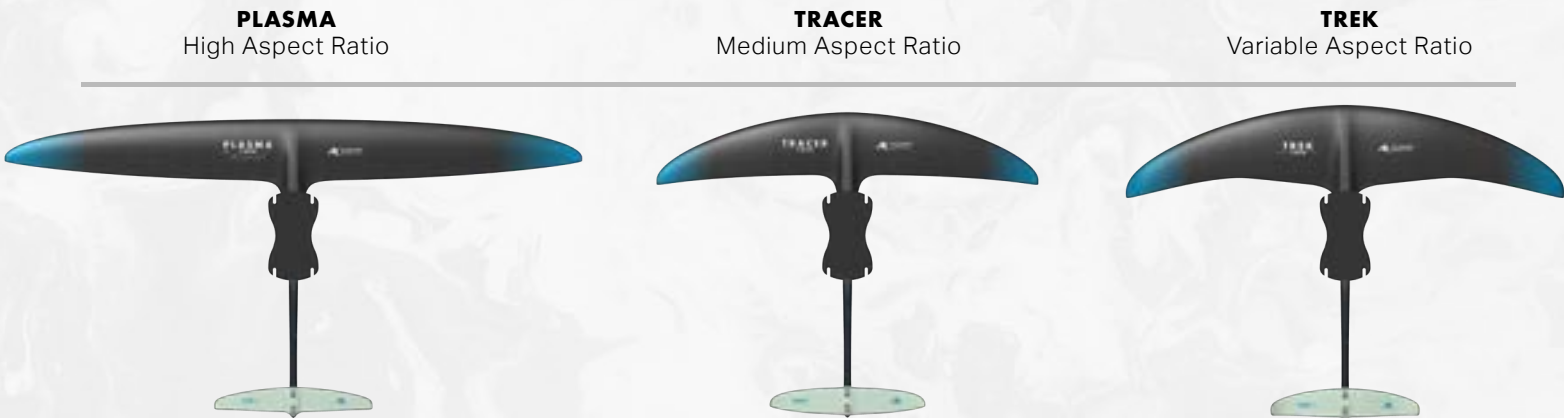

Foiling is the world’s next great adventure, and the Trek Foil Series will take you a long way down the path of foiling freedom. The smooth lift engages the foil intuitively

while remaining incredibly stable, whether blasting along or engaging your inner radness through the turns.

mechanism is designed to be exposed, allowing the mechanism to flush out any sand or salt that may cause regular release mechanisms to jam up and malfunction. The webbing buckles are compatible with all harnesses with 25mm and 40mm webbing slot options.

Depending on your watersport of choice, the interchangeable connection system gives you the opportunity to choose between a rope slider, or an industry standard stainless steel kite or windsurfing hook.

3 x CONNECTION OPTIONS

AEROBAR RS

RATCHET SYSTEM

- Aerobar RS – Quick ratchet adjustment.
- Modular spreader bar platform.
- Ergonomic integrated bar pad.

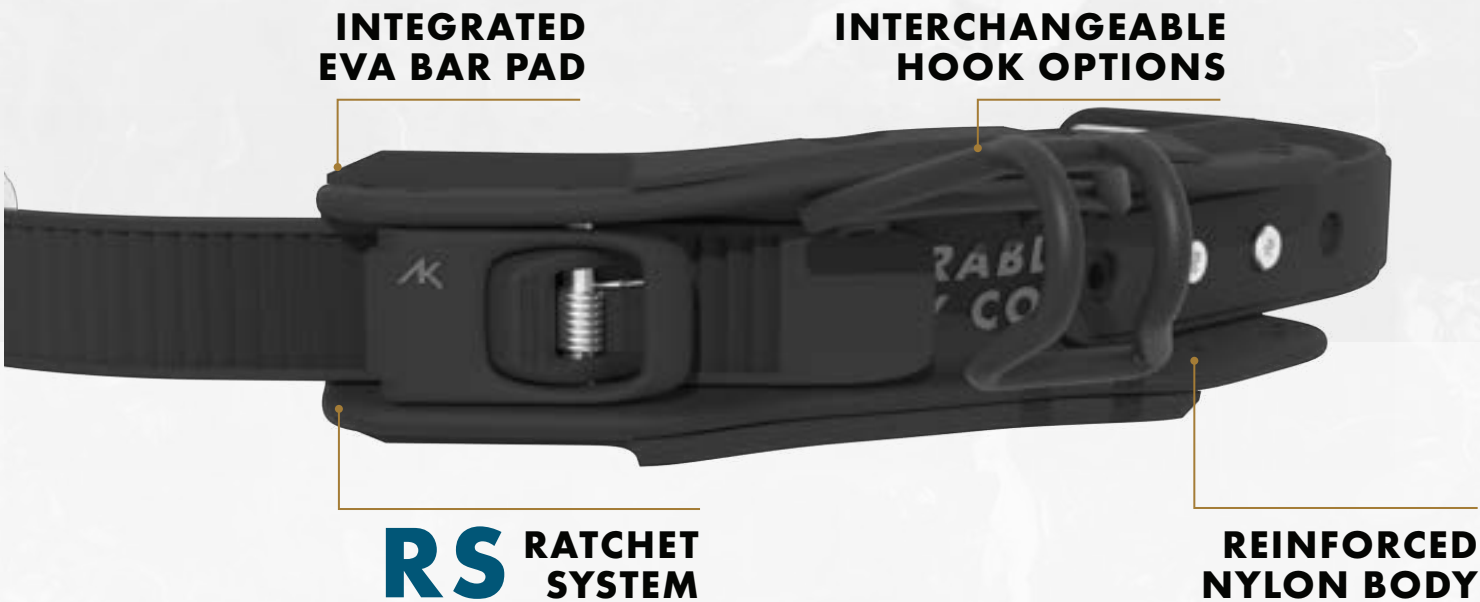

The Aerobar RS is a modular spreader bar platform, featuring an integrated ratchet system, and interchangeable hook options depending on your riding style.

The innovative and intuitive Ratchet System (RS), will keep you locked in, and allows for on the go single handed adjustments while riding. The durable reinforced nylon body and stainless steel hardware provide direct feedback, with built-in comfort thanks to the EVA molded bar pad.

AVAILABLE IN:
S, M, L.

Depending on your watersport of choice, the interchangeable connection system gives you the opportunity to choose between an industry standard stainless steel kite or windsurfing hook.

Note: The Aerobar RS comes kitted with the Synth RS and Method RS waist harnesses.

2 x CONNECTION OPTIONS

CARBON AEROBAR

- One-piece molded composite spreader bar.
- Dual Latch-Lock mechanism.
- Integrated ergonomic bar pad.

The Carbon Aerobar is a unique one-piece molded composite spreader bar, ergonomically designed to move with the curve of your body.

Boasting rigidity, weight reduction using pre-preg carbon fiber, and comfort with a built-in EVA molded bar pad. The dual Latch-Lock mechanism is installed on both sides of the spreader bar to allow easy and

- AVAILABLE IN:
- XS - S
- M - L

instant entry and exit. The release mechanism is designed to release even when under tension, making it arguably the safest spreader bar on the market.

The Aerobar release mechanism is designed to be exposed, allowing the mechanism to flush out any sand or salt that may cause regular release mechanisms to jam up and malfunction.

NOTE: The webbing buckles are compatible with all harnesses with 25mm & 40mm webbing slot options.

ETHER WAIST HARNESS

v2

Minimalist & lightweight waist harness.

Ergonomic lumbar support.

3D load plate with soft edges.

The Ether waist harness is a lightweight, compact harness that prioritizes comfort and durability. By removing all unnecessary padding, seams, and reinforcement, we have created an ultralight harness ideal for riders who travel and have an affinity for minimalism.

Making use of a 3D ergonomically shaped load plate, combined with our Fly-Line load distribution technology,

we have been able to build a harness that offers the ultimate back support while being incredibly thin and light.

The Ether is designed to work with all AK spreader bar systems, allowing the harness to be used by all riders no matter the discipline.

XS / S / M / L / XL

NOTE: Spreader Bar Sold Separately.

SYNTH: Aerobar sold separately with optional kite hook, windsurf hook, or rope slider.

SYNTH RS: Sold with the Aerobar RS with an optional Kite Hammerhead Hook or Windsurf Hook.

Note: The rope slider is only compatible with the Dual Latch-Lock version of the Aerobar, and not the Aerobar RS.

METHOD WAIST HARNESS

v3

Carbon Construction

- Ergonomic hardback support.
- Center oriented stiffness & enhanced edge flex.
- Composite & polymer fusion construction.

The Method features all the crucial elements of a classic hardback, but with added edge flex and accurate anatomical curvature for the ultimate ergonomic fit.

The Method has been designed using years of composite experience, combined with a polymer supporting structure for a 3-stage flex pattern. With maximum stiffness through the center, and flexibility along the harness edge, the hardback is able to flex along with your body’s movement.

XS / S / M / L / XL

SPREADER BAR OPTIONS

Available in the standard webbing & all-new RS (Ratchet System) configuration.

The carbon composite construction of the hardback allows for a long-lasting rigid structure, giving you the same high-level support for an extended period of time.

For the ultimate comfort, the Method features a full neoprene interior combined with a layer of memory foam to cushion your back from the hard external shell.

METHOD RS: Sold with the Aerobar RS with an optional Kite Hammerhead Hook or Windsurf Hook.

ETHER LOW BACK Waist Harness

- Minimalist & low cut waist harness.
- 3D load plate with soft edges.
- Side-to-side sliding hook.

The Ether low back harness is a lightweight, low profile, waist harness that prioritizes comfort and durability. By removing all unnecessary padding, seams, and reinforcement, we have created an ultralight harness ideal for riders who travel and have an affinity for minimalism. Making use of a 3D ergonomically shaped load plate, combined with our Fly-Line load distribution technology, we have been able to build a harness that offers the ultimate back support while being incredibly thin and light.

XS / S / M / L / XL

ETHER SEAT HARNESS

- Minimalist & lightweight seat harness.
- Low hook position ideal for racing & foiling.
- Low cut leg straps to keep the harness down.

The Ether Seat harness is a lightweight, compact, low cut seat harness. The streamlined features minimize obtrusive connection points and reduce weight, while the advanced shaping optimizes freedom of movement and comfort.

The Ether Seat harness features a low hook system, perfect for foiling, high-performance racing, or riders who simply prefer the low down pull.

XS - S / M / L / XL

NOTE: Spreader Bar included.

Black

Teal

FUSE SEAT HARNESS

- Versatile ergonomic seat harness.
- Full back support.
- Reinforced padded handle.

The Fuse seat harness is a classic low-cut seat harness with full back support, perfect for anyone from the first-time rider to a veteran racer.

For those who are learning, with upper back problems, or racing, the Fuse is ideal for low hook style riding and comfort.

XS-S / M / L / XL

NOTE: Spreader Bar included.

CRUZ SHORTS HARNESS

- Integrated boardshorts harness.
- Push button hammerhead spreader bar.
- Lightweight & durable material with side pocket.

The Cruz boardshorts harness combines the support of a kiteboard seat harness with the comfort and casual look of a pair of boardshorts. Integrating years of AK harness development and technology into the Cruz, the boardshorts harness includes a push button hammerhead spreader bar, 8-point load distribution system, and an integrated leash attachment.

XS / S / M / L / XL

NOTE: Spreader Bar Included.

KITE SAFETY KNIFE & POUCH

Convenient pouch for simple harness attachment.

Instant kite line cutting capability.

Compatible with all AK spreader bars.

The AK Kite Safety Pouch can be placed anywhere on your harness by attaching it through the attachment loop.

The AK Kite Safety Knife can also be placed into the built-in pouch of the AK spreader bars.

For emergencies, the AK Kite Safety Knife will instantly cut through kite lines in case you ever get tangled.

BOOTS BINDINGS & STRAPS

ETHER BOOT

High cut freestyle oriented lace boot.
Lightweight, high support, fly-line construction.
Rubber molded heel lock.

The Ether boot is a freestyle oriented binding, constructed with our Fly-Line support around the foot, reducing the weight of the actual material and allowing the supportive load and fast response to come from the lines running through the entire shell.

This high cut boot is built with medium flex in the outer shell and a rubber heel-lock, creating a highly

responsive feel with easy ankle articulation, while still maintaining a high level of support.

The ergonomically shaped high memory EVA insoles allow for uniform shock absorption and stability underfoot, keeping you comfortable and on the water for longer.

US: 6-7 / 8 / 9 / 10 / 11 / 12-13

STATIC BOOT

Low cut freeride oriented Velcro boot.
High flex with replaceable Velcro straps.
Central heel locking strap.

The Static boot is the ultimate freeride binding, with its easy entry and exit, full Velcro configuration.

This low cut boot is ideal for park and feature riding where high flex is required for stylish grabs, rail tricks, and overall comfort when spending a lot of time on the water. The diagonally oriented center Velcro strap acts

as a heel lock, while the Velcro configuration allows for a convenient single handed strap in.

The ergonomically shaped high memory EVA insoles allow for uniform shock absorption and stability underfoot, keeping you comfortable and on the water for longer.

US: 6-7 / 8 / 9 / 10 / 11 / 12-13

ETHER BINDINGS

Ultralight minimalist performance binding.
Soft & comfortable screw adjust footstrap.
Self adhesive EVA ultracush footbed.

The Ether is a self-adhesive, ultralight, high-performance binding. Featuring an ultracush EVA footbed that is designed for high grip and to cushion your feet during high impact landings. Considering there is no baseplate adjustment with the self-adhesive pad, the Ether Binding features a soft & comfortable screw adjust footstrap to keep you locked in.

OSFA: **US 7 - 13**

NEW - SHIPPING AUGUST 2025

ELEMENT BINDINGS

v2

Premium ergonomic support binding.
Dual molded direct impact footbed.
Angled adjustment straps to fit all foot shapes.

The Element sets the standard in comfort, durability, and ergonomic support. Featuring an ultra-comfortable dual molded direct impact footbed, the Element offers the ultimate ergonomic foot support to cushion your feet during high impact landings. The variable angle adjustment strap works in conjunction with the directional grooving to keep your foot firmly in place. This, combined with the adjustable rubber molded tongue, enables you to fine-tune the Element to fit your specific foot shape and create the ultimate connection to the board.

OSFA: **US 7 - 13**

NEW COLORWAY SHIPPING AUGUST 2025

BOOST BINDINGS

v2

Velcro fastened foot strap.
Directional grooving for maximum grip.
Lightweight pre-curved chassis.

The Boost binding features simplicity, comfort, and durability at its finest. With a single Velcro closure, the strap is quick and easy to tighten or loosen for various foot sizes, with or without booties. The Boost features a single density footbed, for a sturdy but soft feel underfoot. The Boost offers two size options to fit the smallest to the largest foot. The baseplate is pre-curved to create a tensioned connection to your board, making the edge of the binding harder to lift, avoiding debris and kite line catches.

WATER SAFETY

TRANSIT FLOATATION VEST

CE Certified Personal Floatation Device.

Integrated hydration bladder & stash pouch.

Adjustable waist & shoulder straps.

The Transit floatation vest is a CE Certified Personal Floatation Device (EN ISO 12402 – 5), with a performance Level 50 buoyancy aid rating.

The Transit is optimized for paddle sports with its high cut, and integrated hydration bladder. Featuring a chest pocket to hold your essentials when paddling for a long period of time or competing in races, and a dual

side strap closure to make sure the vest stays fastened at all times.

The adjustable waist and shoulder straps allow for maximum comfort for users of all sizes, as well as riders wearing varied protection when on the water.

XS - S

M - L

XL - XXL

CONTACT IMPACT VEST

Side-entry impact vest.

Harness Panel with reduced waist padding.

Upper back & rib cage impact protection.

The Contact impact vest features foam shock panels in a highly flexible package, providing added protection to the upper back and rib cage. With reduced padding around the waist, it is perfectly compatible with any waist harness.

In conjunction with the ergonomic panel layout, the side-entry zip closure removes the bulk from the chest panel for added flexibility and a snug fit.

XS / S / M / L / XL / XXL

Please Note: This is an impact vest and not a floatation device or buoyancy aid.

RIOT HELMET

CE Certified for watersports use (CE 1385).

Rear dial fit-adjuster & fit pad kit.

Detachable ear covers - sold separately.

Channelling the crossover athlete, the Riot helmet is manufactured in collaboration with Predator Helmets to bring you a CE Certified helmet suitable for park, cable, and kiting.

With a rear dial fit-adjuster, additional pads, and the optional detachable ear covers, you can customize the helmet to give you a good, snug, fit.

S - M

L - XL

The Riot features 12 vents for great drainage to reduce water retention, and a hard shell for impact resistance, keeping your head in one piece.

RIOT IMPACT VEST

Side-entry impact vest.

Ergonomically shaped foam for flexibility.

Upper back & rib cage impact protection.

The Riot impact vest features foam shock panels in a highly flexible package, providing added protection to the upper back and rib cage, making it perfect for wake, kiting, and foil surfing.

In conjunction with the ergonomic panel layout, the side-entry zip closure removes the bulk from the chest panel for added flexibility and a snug fit.

XS / S / M / L / XL / XXL

Please note:

This is an impact vest and not a floatation device or buoyancy aid.

CE FLOATATION VEST

CE Certified floatation vest.

Multisport vest for deep water sports.

Chest pocket & lock down webbing loop.

The CE floatation Vest is a CE Certified Personal Floatation Device (EN ISO 12402 – 5), with a performance Level 50 buoyancy aid rating.

Featuring a chest pocket to hold your essentials when riding for a long period of time or competing in races, and a dual side zip closure to make sure the vest stays fastened at all times. The elastic shoulder straps allow for maximum comfort for all sizes of riders, as well as riders

wearing varied protection when in the water. This floatation vest is a cross disciplinary vest and is suitable for any water sport, including kiteboarding, windsurfing, and wakeboarding.

The vest features a base webbing loop to lock around your spreader bar hook, preventing the vest from riding up while riding.

6' SEMI-COIL LEASH

6' x 0.31" (8mm) semi-coil leash.

Designed for knee or calf use.

Double stainless-steel swivels.

The 6' Semi-Coil leash provides a unique foil specific solution, where the coils avoid interference with the foil when paddling, and the straight segment prevents the coils from wrapping around your feet and toes when up and riding.

The Velcro knee or calf connection keeps the leash up and out of the water when foiling, while the stainless-steel double swivels keep the leash spinning smoothly to avoid interference.

NEW - SHIPPING JUNE 2025

6' WAIST LEASH

6' x 0.31" (8mm) semi-coil leash.

Adjustable waistband with internal grip.

Double stainless-steel swivels.

The 6' waist leash is a durable and super comfortable waist leash that is engineered to keep your board secure without restricting your movement. The waistband is fully adjustable for a snug, custom fit, while the internal grip keeps the leash securely in place, preventing

any slippage during intense sessions. Featuring dual stainless-steel swivels, the waist leash ensures tangle-free performance no matter how much you move or twist.

APPAREL
