NSP | WELCOME TO 2026

Celebrating 25 years in the industry, NSP is proud to present our 2026 SUP range. This collection continues to focus on delivering stability, ease of use, great performance on the water and great value. Alongside our proven favourites, we're introducing exciting new additions to the stand up paddleboard range, including the Journey Tough Tourer for adventure seekers, the High Roller Elements for progressive surf sup paddlers, and an updated Inflatable Series featuring new Cruise shapes and Touring models. These join the ever expanding NSP lineup to offer something for every paddler skill level to suit all conditions.

Thank you for your support and for being part of our journey. Just add water!

NSP | CRUISER

The Cruiser HIT is ideal for paddlers wanting an all-around, family-friendly durable paddleboard. We used the new and ultra-durable High-Impact Technology (H.I.T.) to create an amazing recreational shape.

All four Cruisers HIT (9'8", 10'2", 11'2" and 11'6") are designed with stability, glide and easy turning in mind. Volume is evenly distributed through the standing area while the wide round nose and tail really help with a stable standing position. The tail section of the HIT Cruiser SUPs benefit from a concaved V-bottom that makes turning even easier.

To develop the Cruiser, we worked on a proven shape from the successful Elements range and improved the outline, rail and bottom shapes for a better glide over flat water. This directly affects the allround paddling performance for everyday use, but with some key design characteristics, accomplished paddlers will also appreciate taking this Cruiser into small and medium waves.

- A standing guide on the deck pad will help first-timers find their standing position on that all-important maiden voyage.
- Locking anchor hole on the nose makes it easy to securely tie several boards together with a single cable.
- Full-length thermoformed EVA deck pad for durability and comfort.
- MB screw insert available on all models to attach windsurf mast base.
- All other Cruisers feature an MB screw insert for a universal mast base.

NSP Journey Tough Tourer, Built to Explore, Designed to Last

For paddlers who need a rigid, durable touring board that stands up to everyday use, the NSP Journey Tough Tourer delivers the perfect combination of stability, speed, and reliability. Whether you're exploring coastal waters, paddling long distances, or loading up for multi-day trips, this board is built to go the distance.

Designed in HIT construction for exceptional toughness, the Journey Tough Tourer is a premium hardboard solution that eliminates the need for inflatables while providing superior rigidity and glide. Its efficient shape and displacement-style nose cut through the water effortlessly, while the streamlined width offers the right mix of speed and stability for everyday paddlers.

A carefully positioned deck pad provides targeted grip and comfort where you need it most, without adding unnecessary weight. Front and rear cargo mounts allow for secure gear storage, making it ideal for adventure paddlers who need to carry extra equipment. Paired with a 9" touring fin for excellent tracking and control, the Journey Tough Tourer is a reliable choice for paddlers looking for a board that will last for years to come.

Key Features:

- Tough & Rigid HIT Construction – Built to withstand years of paddling with impact-resistant materials.
- Efficient Touring Shape – A displacement-style nose enhances glide and efficiency over long distances.
- Balanced Speed & Stability – 12'6" x 30" and 14'0" x 29" dimensions offer an ideal touring experience.
- Optimized Deck Pad – Targeted traction provides grip and comfort where it's needed most.
- Multiple Cargo Mounts – Front and rear tie-downs allow for secure gear storage.
- 9" Touring Fin – Enhances tracking and control for a smooth paddling experience.

Wherever your journey takes you, the NSP Journey Tough Tourer is ready for the adventure.

White

One of our best-selling boards in the SUP range is also one of the most popular cruising SUP's in the world.

Suitable for riders of all sizes and skill levels, the design features a wider nose and rounded square tail creating a stable platform with generous volume and easy turning.

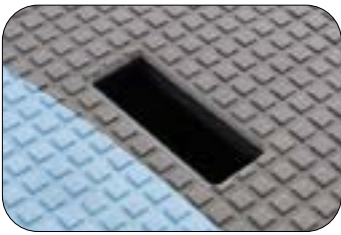

- A double concave delivers glide and rewards as a super stable board that performs best on flat water, small waves and breaks.
- The combination of fiberglass, durable gel coat skin, glass stringers, a wood layer under the standing area and a secure-cell EPS core make this board durable, great value and with enough performance to enjoy it for years to come.
- Bungee cord on the nose to carry all your gear.
- Thermoformed EVA deck pad for ultimate grip and comfort.
- FCS plug on the nose to mount your action camera.

Elements

NSP | OMNI

Elements

The word 'Omni' is Latin for 'All' or 'every' and is the perfect description for the board Alain Teurquetil and the NSP R+D team set out to create with this versatile game changer.

The Omni combines the nose of our renowned and multiple world title winning race boards, a cleverly designed hybrid rocker and the tail from the High Roller longboard surfing SUP. The result is an Omni-capable board that rides waves well, cruises on flat or bumpy ocean water with effortless stability and an efficient speedy glide and is also the perfect board to train for and enter your first races.

More than just a single board, the Omni's are extremely usable, comfortable, and an effective option no matter where or when you find time to get on the water. The Omni is available in 12'6 and 14' options and maintains a low center of gravity for comfort and stability.

Supplied Fins:

- NSP 9" Hybrid fin

Tech Features:

- Lightweight, water resistant EPS core for enhanced performance and flotation.
- Tough epoxy outer shell provides excellent protection against wear and damage.
- Reinforced dugout deck for added durability.
- Thermoformed deck pad for grip and comfort.
- Single fin setup for great tracking and directional stability.
- Ergonomic ledge carry handle for comfortable transportation.
- Wide and stable outline ensures enhanced stability.
- Subtle nose rocker for improved manoeuvrability in choppy conditions and small surf.
- Precision moulded technology core increases stiffness and durability, maximising performance on the water.
- UV stabilised finish resists sun damage and maintains its appearance over time.
- Bungee cord to secure loose items while paddling.

NSP | INSTIGATOR 2.0

NEW
DESIGN

NEW
SHAPE

SLX
FLAX

The Instigator is a take no prisoners performance board. Featuring a deep single concave nose to tail and slightly curvier rocker complimented by a heavily influenced performance shortboard outline, this Surf SUP board is designed for those about to rock.

With its curvy rocker, squash tail and hard tail edges the concave acts to straighten the curve along the stringer creating a board that is blisteringly fast, but has a short turning arc that wants to go vertical and fit into hollower waves.

Designed by Alain Teurquetil and tested by Ty Judson and the NSP team this board has proven a real contender for the crew that want to shred. Set up with a 4 plus 1 fin configuration it allows maximum versatility to be set up as a single, 2 plus 1, quad or thruster. You choose the set up that allows you to best blast your way to the beach.

Design:

- Deep single concave for maximum speed, combined with a curvy rocker, fast and loose.
- Shortboard inspired outline.
- 4 + 1 Fin box setup

Supplied Fins:

- NSP J5 Center RTM
- NSP J5 side L/R

Wood Veneer texture

Flax rails

Arch bar and kick tail

J5 Multi System fin box

HIGH ROLLER

NEW
DESIGNNEW
SHAPESLX
FLAX

Designed by Alain Teurquetil the High Roller is a product of continued evolution of this style of surfing and popularity amongst riders looking to reclaim the feeling that kick started things to begin. With subtle nods to the most functional design elements of high performance short and longboards combined with traditional outlines this board rides fast, super smooth and forgiving, allowing surfers to paddle in early, ride the nose, trim and flow, as well as cross-step back to the tail and smash the lip.

Design:

- Forward V to subtle V double concave through the tail.
- Fast, sits on rail and cuts through chop.
- Wide point forward outline, more area in front of your feet adds paddling stability.
- Reduced tail width for surfing performance and control.
- Box plus FTU sides; ride as a single fin, 2 plus 1 or as more thruster set up with a smaller back fin and larger sides.

Construction Design:

- Full Paulownia wood deck for added strength and rigidity
- Eco friendly flax rails
- Added EVA grip towards the nose
- 2 + 1 Fin box setup for added versatility
- High nose and medium tail rocker

Supplied Fins:

- NSP Wave 6 RTM center
- NSP J3 side L/R

NSP | OMNI

The word 'Omni' is Latin for 'All' or 'every' and is the perfect description for the board Alain Teurquell and the NSP R+D team set out to create with this versatile game changer.

The Omni combines the nose of our renowned and multiple world title winning race boards, a cleverly designed hybrid rocker and the tail from the High Roller longboard surfing SUP. The result is an Omni-capable board that rides waves well, cruises on flat or bumpy ocean water with effortless stability and an efficient speedy glide and is also the perfect board to train for and enter your first races.

More than just a single board, the Omni's are extremely usable, comfortable, and an effective option no matter where or when you find time to get on the water. The Omni is available in 12'6" and 14' options and maintains a low center of gravity for comfort and stability.

Supplied Fins:

- NSP Surf race 20

Tech Features:

- SLX Carbon construction for added strength and less weight.
- Unidirectional (UD) carbon rail for enhanced rigidity and durability.
- Carbon innegra nose and tail reinforcement for extra impact protection.
- Fiberglass T-Stringers for added stiffness.
- Ledge handle for easy carrying and transport.
- Bungee cord to secure loose items.
- Thermoformed EVA deck for added grip.
- Low center of gravity for comfort and stability.
- Goretex valve

NSP | ALL WATER

A unique blend of paddling stability, comfort, cruising speed and glide.

The All Water P2 is a unique blend of paddling stability, comfort, sustainable cruising speeds and glide. All Water is about the joy of paddling and these boards are equally fun on an estuary, river, lake, coastal cruising, fitness training or short open water runs in light conditions.

- Developed by NSP's race design team to be the first choice for All Water paddling and recreational touring.
- Built in sturdy P2 construction, the All Water is affordable, extremely durable and a fantastic choice for recreational paddling.
- Trim guide on deck standing area to assist with proper foot placement.
- Fitted with plugs on the nose for cargo straps to take food, water, life jackets and camping gear.
- Fully protected on the nose and tail with EVA bumpers. The soft top and soft bottom make this a favorite for tour operators, rental centers and holiday resorts.

*In order to reduce our carbon foot print we offer to ship the soft boards with or without boxes (special conditions apply).

NSP | CRUISE

The NSP Cruise is one of the best-selling boards in the SUP range and one of our more popular shapes worldwide. Cruising on a quiet body of water is an essential part of the stand-up paddling experience, and most SUP athletes covered their first meters on an NSP Cruise at some point in time.

Available in a single size, this P2 Cruise makes things easy for your customers. Take their decision-making out of the equation as any rider will enjoy paddling these.

- Suitable for riders of all sizes and skill levels, the design features a wider nose and rounded square tail creating a stable platform with generous volume and easy turning.
- Full EPS glass wrapped for extra strength and durability.
- Durable slick bottom.
- Full thermoformed EVA deck pad with inserts to attach a personal flotation device.
- Bungee cord on nose to carry extra gear.
- Nose and tail rubber bumpers for extra protection.
- Carry handles nose and tail.

EASY-TO-USE STANDING GUIDE

The standing guide on the deck pad will help first-timers find their standing position that all-important maiden voyage.

NSP | ALLROUNDER

A perfect blend for sup surf wave riders and paddlers looking to learn and have fun in the surf. The Allrounder, in P2 Soft, is a perfect option for venues who need a rugged, ding-resistant and a safe surf SUP board.

- Proven outline with semi pointed surf style nose with moderate nose lift, a forward wide point for stability and easy paddling.
- 3x MFC-designed fins on the 8'0" for surf performance
- 2+1 with MFC-designed side bites on the 9'2"
- Full EPS glass wrapped for extra strength and durability.
- Durable slick bottom.
- Full Thermoformed EVA deck pad with inserts to attach a personal flotation device.
- Nose and tail rubber bumpers for extra protection.
- Carry handles nose and tail.
- Trim guides to assist with proper foot placement.

Two sizes, different setups

The Allrounder comes in 8'0" and 9'2", with the big difference in their respective fin clusters. The 8'0" comes with a surf-oriented thruster setup, whereas the 9'2" features a more generic 2+1 setup, each with different fin packages. The 8'0" comes with a set of MFC-designed FTU fins, and the 9'2" features a 8" center fin with two MFC-designed side bites.

NSP

CRUISER LT

NEW
DESIGN**NSP Cruiser LT – Effortless Paddling, Anywhere You Go**

Looking for a paddleboard that's easy to transport, store, and set up—without sacrificing performance? The NSP Cruiser LT is the answer. This inflatable SUP offers the stability and smooth ride of a traditional board, with the added benefits of portability and convenience. Whether you're heading to the beach, exploring inland waterways, or traveling to your next adventure, the Cruiser LT makes getting on the water easier than ever.

With a wider outline and generous volume, the Cruiser LT provides exceptional stability, making it a great choice for beginners or those looking for a relaxed paddling experience. Built with lightweight single-layer drop-stitch technology and reinforced rails, this board offers impressive rigidity while remaining easy to carry, pack, and store. The thermoformed EVA deck pad ensures all-day comfort, while the board's quick-inflation system means you'll be paddling in minutes.

Equipped with a 9" center fin for excellent tracking, multiple carry handles for easy transport, and a front bungee storage system to secure your gear, the Cruiser LT blends functionality with fun. When you're done, simply deflate, roll it up, and pack it into the wheeled travel bag—ready for wherever your next session takes you.

Key Features

- **Inflatable Convenience** – Packs down easily for travel and storage, without compromising performance.
- **Stable & Versatile Shape** – A wider outline and balanced volume offer confidence-inspiring stability for all paddlers.
- **Durable Lightweight Construction** – Single-layer drop-stitch body with reinforced rails ensures durability and rigidity without excess weight.
- **Thermoformed EVA Deck Pad** – Soft, grippy, and long-lasting for superior comfort on longer paddles.
- **Reliable Tracking & Control** – 9" center fin enhances glide and directional stability.
- **Front Bungee Storage System** – Secure your gear for extended paddling sessions.
- **Multiple Carry Handles** – Neoprene handles at the nose, center, and tail for easy transport on and off the water.
- **Complete Travel Package** – Includes a backpack, coiled leash, 3-piece adjustable alloy paddle, double-action pump, and repair kit.

Wherever your next adventure takes you, the NSP Cruiser LT is ready to go with you.

TOURING LT

NEW DESIGN

NSP Touring LT – Explore Further, Paddle Smarter

Engineered for adventure, the NSP Touring LT is the go-to inflatable touring SUP for paddlers who value glide, efficiency, and portability. Whether you’re covering long distances, loading up for a multi-day trip, or just enjoying a smooth cruise on open water, the Touring LT delivers a responsive yet stable ride.

With its refined 12’6” x 32” outline, this board balances speed and stability, giving paddlers the confidence to push further with less effort. Built with lightweight single-layer drop-stitch construction and reinforced rails, the Touring LT offers reliable rigidity while remaining easy to carry, store, and travel with. The thermoformed EVA deck pad provides lasting comfort and grip, even on extended adventures.

Equipped with a 9” hybrid touring fin for excellent tracking, multiple cargo mounts for extra gear, and three neoprene carry handles for easy transport, the Touring LT is purpose-built for exploration. When it’s time to pack up, the board deflates quickly and fits neatly into its premium wheeled travel bag, ready for your next destination.

Key Features

- **Touring Shape** – The 12’6” x 32” design delivers the ideal blend of speed, glide, and stability.
- **Lightweight Construction** – Single-layer drop-stitch body with reinforced rails ensures durability and rigidity without excess weight.
- **Hybrid Touring Fin** – 9” center fin enhances tracking and efficiency over long distances.
- **Thermoformed EVA Deck Pad** – Soft, grippy, and comfortable for long sessions on the water.
- **Expanded Storage Options** – Front and rear bungee tie-downs hold extra gear securely.
- **Multiple Carry Points** – for easy transport.
- **Accessory Mounts** – Two integrated mounts for GPS, cameras, or drink holders.
- **Compact Travel Kit** – Includes a backpack, paddle, double-action pump, and repair kit.

From weekend explorations to long-distance journeys, the NSP Touring LT makes it easier than ever to pack light, paddle far, and explore with confidence.

QUEST

NEW
DESIGN

NSP Quest – The Ultimate Inflatable SUP for Fishing, Exploration and Adventure
Looking for a paddleboard that takes you beyond the usual waters? The NSP Quest is built for those who seek adventure, whether it's navigating remote waterways, fishing in secluded spots, or heading out to island hop on a multi-day expedition. With its compact inflatable design, the Quest offers the stability, durability, and versatility needed to handle a wide range of environments, from calm lakes to rugged coastlines and winding rivers.

Designed with extra width and high sidewalls, the Quest offers a rock solid platform for paddlers carrying extra gear, making it ideal for anglers, campers, and explorers. Its reinforced multi-chamber construction ensures both durability and safety, while multiple attachment points, D-rings, and cargo straps let you customise your setup with fishing gear, coolers, or extra storage.

Easy to pack and transport, the NSP Quest makes adventure paddling more accessible than ever. Whether you're on a solo fishing mission or a long-haul exploration, this board is ready for the challenge.

- **Inflatable Adventure SUP** – Designed for exploration, fishing, and long-distance paddling with ultimate portability.
- **Stable and Spacious** – Extra width and high sidewalls provide superior stability, even when carrying heavy gear.
- **Reinforced Multi-Chamber Construction** – Durable and safe with four air chambers, including an extra deck chamber for added security.
- **Customizable Setup** – Multiple accessory mounts, D-rings, and cargo straps allow for fishing gear, coolers, or additional storage.
- **Durable Fusion Technology** – Reinforced double-layer construction ensures strength and longevity in various conditions.
- **Versatile Performance** – Suitable for lakes, rivers, coastal waters, and remote locations.
- **Easy to Transport and Store** – Deflates into a compact size, making it simple to pack and carry for any adventure.

NSPIRATION MAT FS

NEW
DESIGN

Looking to bring a sense of calm, focus, and mindfulness to your practice? The NSPiration Mat is an inflatable fitness platform designed to elevate yoga, Pilates, and functional training by connecting movement with the natural flow of water. Whether you're deepening your breath-work, refining your balance, or building core strength, this floating mat encourages a deeper mind-body connection while gently challenging stability.

Designed for use in pools, lakes, and calm waters, the NSPiration Mat provides a stable yet dynamic surface that enhances focus, coordination, and flexibility. Its durable drop-stitch construction ensures rigidity and support, while the heavy-duty D-rings allow for secure anchoring during practice.

Lightweight, portable, and easy to set up, the NSPiration Mat transforms any body of water into a peaceful floating studio—perfect for personal meditation, group fitness classes, or wellness retreats.

Key Features

- Floating Yoga & Fitness Platform – Designed for yoga, Pilates, and strength training on water, enhancing balance and core engagement.
- Stable & Rigid Design – Drop-stitch construction provides a firm, supportive surface while maintaining a natural water feel.
- Secure Anchoring System – Heavy-duty D-rings allow for easy attachment, keeping the mat in place during practice.
- Versatile Use – Ideal for pools, lakes, and calm coastal waters, perfect for personal use or group classes.
- Portable & Easy to Store – Inflatable design makes it simple to transport, deflate, and store when not in use.
- Premium Comfort, Soft, non-slip surface ensures grip and comfort for all types of movements and poses.

Find your flow and embrace the serenity out on the water.

PERFORMANCE RACE FSL

NEW
DESIGN

NEW
SHAPE

In a world where it is not always practical to travel or store a 14ft Pro Carbon race board, the NSP Race division delivers its Performance Race FSL (Fusion Light) series of inflatable SUP.

We are stoked to introduce the Performance Race FSL which features an additional chamber in front of the standing area emulating the volume in the nose of our world title winning race boards. This not only helps reduce the water from entering the standing zone but also assist the nose to resurface without flutter maximising speed and efficiency to maintain high speed paddling.

In addition to the current Race FSL with its light weight construction and unique features, this model also includes the removable fin box system that significantly reduces drag. The NEW Performance Race FSL delivers exceptional performance gains, further bridging the gap between the hydrodynamics of the Pro Carbon and inflatable race series.

NSP continues to push the boundaries of innovation in its relentless focus to building better, faster, stronger race winning boards for all our champions and athletes.

- New low-profile Air7 V3 finbox system creates less drag while racing and allows for easy board roll-up while not in use.
- Accessories mount for GPS / Trip Computer.
- Thermoformed EVA Deckpad for durability, grip and comfort.

NSP | CARNIVAL CRUISER HD

NEW
DESIGN

CREATE UNFORGETTABLE PADDLE EXPERIENCES Sharing the stoke is what the Carnival Cruiser is all about. Created to get everyone on board, the Carnival Cruiser lowers the entry barrier to SUP if there ever was one. For resorts, beach clubs, schools and event organizers, the Carnival Cruiser is inflatable, comes with a royal amount of soft EVA and offers the best possible shared paddling

Experience for groups of up to 10 people. Explore local waters, paddle into a party wave or race another Carnival Cruiser - the choice is yours, and they're all fun!

- Thermoformed Full EVA Deck pad
- 12x Neoprene handles
- Oversized bungee straps to secure everyone's gear
- 7 Heavy-duty reinforced D-rings
- Triple reinforced rails for strength and rigidity
- Double sealing rail band for durability and strength
- Easy to inflate with two air valves
- Recommended pressure 15 - 18 PSI

7 super heavy-duty reinforced D-rings

Bungee cord for cargo

Double sealing rail band

10" fin & 7.5" fin

Package includes :
Foldable heavy duty, 2x Double action pump, Fin and Repair kit

Carry Bag

2 x High capacity double action pump

NSP | PUMPS INFLATABLE

HIGH PRESSURE TRIPLE ACTION PUMP

- Biggest SUP pump on the market
- Capacity 3.5 + 3.5 L
- Max pressure 26psi
- 3 stage individual adjustable between max capacity [1], medium [2] & max pressure [3]
- Ergonomic handlebar and Canted foot packs

HIGH CAPACITY DOUBLE ACTION PUMP

- Offered with all FS inflatable boards
- Ergonomic handle
- Double to single action switch
- High airflow piston for easy inflation
- Capacity 2.0 + 2.0L max pressure 26psi

Air7 Raceboard Finbox

NSP has partnered with Air7 Fin Systems, the leader in performance and quality parts for inflatable water craft since 2009, for the next fin revolution on our Race Inflatable range. The Air7 (V3) is the future fin system for all inflatable boards. The thickness of inflatable boards is not always the same and with the V3 you can now easily adjust the fin box to suit all thicknesses, from 4 inches to 6 inches and more.

The low-profile fin box creates less drag while racing and when not in use, remove the box, easily roll up the board and store it in the supplied backpack.

Specs:

The 210mm / 8.3 inch fin track makes the V3 compatible with your existing NSP Race fins and suits most classic US box fins and a growing range of "push in and go" Click Fins.

Benefits:

• Low profile.

The V3 is more hydrodynamic than other fin boxes on the market, with a lower profile, offering less drag, making the board more efficient and faster. And the V3 fin box gives the board the look, feel and performance of a "hard board".

• Stronger and stiffer.

Not only joined to the bottom surface, the V3 is also connected to the top and internal portion of the board. This makes for not only a much stronger, but stiffer board, which equals less losses to flex and more power transferred into your ride with every stroke.

• Completely removable. Travel easier, stow smarter.

The clear benefits to the customers is the board is less cumbersome and now much more easy to roll-up and store. To retailers and warehouses, the benefits include: smaller packing, less storage volume, less warehouse space and reduced transportation fees.

• Replace parts easier:

Fixing and replacing broken fin boxes creates a lot of undue stress, cost and frustration to customers and brands. Eliminating downtime on the water is key and with the "pop-in and go" ease of the V3, riders are back on the water in no time. Replacement parts can now be easily kept in stock, greatly reducing shipping back and forth across the country / world.

• Better for the Environment.

Reduced shipping volume = smaller carbon footprint. In addition, with a non-permanent, non-glued and removable part, it is much easier to replace and recycle due to damage or at the end of board life. The V3 puts us one step closer to saving the planet!

NSP | PADDLES

Our NSP paddle range is designed to get you where you want to go with ease, efficiency and speed. Utilizing the best materials, lay-ups and production processes, NSP paddles are engineered with just the right amount of flex, strength and weight to allow for longer paddle sessions on the water.

The power face of our Speedster and Allround models are exactly the same, however the difference lies in the lay-ups. We now offer our top of the line carbon, eco-friendly coco fiber hybrid and an eco, but yet price-friendly carbon hybrid with a more pronounced dihedral.

The raised and extended dihedral provides more strength to the blade and allows a smooth transition and thinner blade. The edge is only 1.7mm thick, creating the smoothest water entrance with immediate bite. The raised tip is parallel to the shaft for aggressive catch and controlling the pace going through the power face.

Every rider will have the same feel when the blade hits the water. NSP blades produce consistent speed, conserve energy and allow paddlers to get more out of their session, every single time.

NSP | VIVACE

100% CARBON PADDLE

Key Design Elements:

- Double Dihedral Blade
- Increased Torque and Power
- Ergonomic Handle
- BIAx and 3K Twill Carbon Fibre Construction

VIVACE - Double Dihedral

The blade design ensures exceptional stability, minimising blade flutter for a smooth and efficient controlled power stroke, ultimately resulting in higher cadences.

Engineered to meet the demands of competitive racers and avid tourers, the Vivace is available in sizes 74, 79 and 84, catering to paddlers of various strengths and preferences, allowing you to select the ideal size for your style and power needs. Crafted with a 100% carbon fibre construction, the Vivace offers unparalleled durability, strength, and lightweight performance, equivalent of the Speedster thanks to its BIAx and 3K twill carbon fibre construction ensuring performance without compromise. The newly designed ergonomic handle ensures a comfortable and secure grip, enhancing control and reducing hand fatigue during extended use.

Every stroke with the NSP Vivace delivers increased torque, translating to greater power and improved acceleration. Particularly advantageous in challenging conditions where maintaining efficiency is crucial.

Whether you're sprinting or maintaining a steady pace, the double dihedral shape optimises performance by maximising torque and forward thrust, perfect for short sprints, technical courses, long distance paddling, or recreational paddling.

Experience the perfect balance of innovation, performance, and durability with the Vivace. Paddle with confidence and propel yourself onto the podium!

A PERFECT PADDLE STROKE EVERY TIME ON THE WATER!

- The Speedster, Allround and Elements models have the same power face.
- New designed profile of the power face.
- More pronounced dihedral - beginning right at the shaft, we created a double concave to direct the water flow, giving stability through the whole stroke while minimizing fluttering.
- The higher dihedral provides more strength to the blade and allows a smooth transition.
- The edge is only 1.7mm thick, creating the smoothest water entrance with immediate bite.
- Raised tip is parallel to the shaft for aggressive catch and controlling the pace going through the power face.

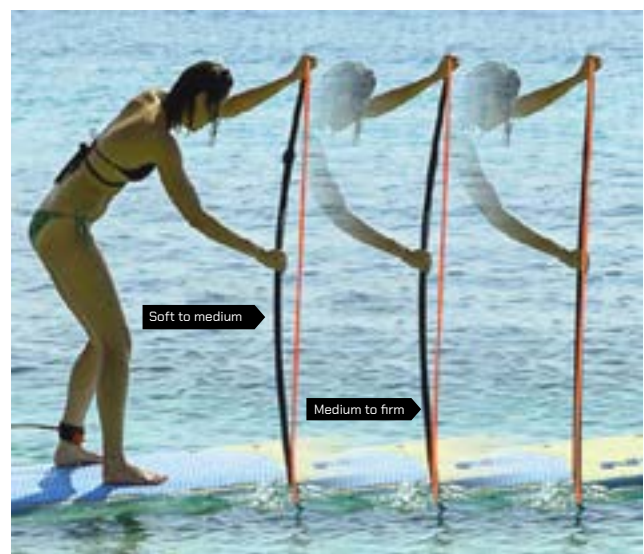

FLEX

Medium to firm flex

- Available with all Speedster paddles
- Perfect for paddlers and racers who are looking for direct power transfer and minimal flex
- Grip Tech Texture for better grip and performance

Soft to medium flex

- Available with all Allrounder, Elements Carbon and Hybrid Carbon
- The perfect shaft to avoid shoulder pain on longer tours.
- Grip Tech Texture for better grip and performance

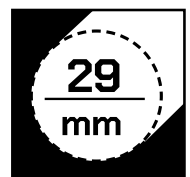

GRIP TECH

STANDARD DIAMETER

NSP's standard 29mm shaft is the most-used performance shaft in all paddling conditions.

Available for :

- Allround paddle shafts
- Speedster paddle shafts
- Vivace paddle shafts

REDUCED DIAMETER

Perfect for hardcore endurance athletes, reduced diameter (RDM) shafts work for any rider wanting a scaled-down shaft for their paddling - not just kids and women.

Available for :

- Speedster paddle shafts
- Vivace paddle shafts

CARBON FILAMENT

Large-scale adoption of carbon fiber technology allows us to build some of the fastest and lightest paddles on the market.

A filament shaft is the perfect balance between tensile strength and torsion resistance. Due to the computer controlled continuous fiber wrap around the shaft, a high consistency is achieved. The result is an incredibly light, thin, durable and flexible shaft wall.

2-PIECE ADJUSTABLE SHAFT

Our Hybrid adjustable paddles are great options for those looking to travel or share with their friends. The Carbon Hybrid adjustable offers not only an eco-friendly option, but a great step-up option from our popular Alloy. All of our adjustable paddles are perfect for any recreational paddler, school or rental center.

Available for :
Allround Carbon Hybrid (86 sqi)
Allround Alloy (94 sqi)

Adjustable from :
170 cm - 212 cm
170 cm - 212 cm

3-PIECE ADJUSTABLE SHAFT

For people who like to take their paddle everywhere they travel, our 3-piece adjustable is the perfect choice. You can easily disassemble and pack the paddle in a standard size suitcase or if traveling with our inflatable board the 3-piece is the perfect companion and fits nicely inside the supplied inflatable bag.

Available for : Allround Carbon (86 sqi)
Adjustable from : 170 cm - 212 cm

ADJUSTABLE CLAMPS & HANDLES

Performance Clamps

- NSP's clamping feature allows you to easily adjust the length of your paddle shaft while maintaining a tight seal.
- The inner groove slot reduces movement and twisting when locked into place.

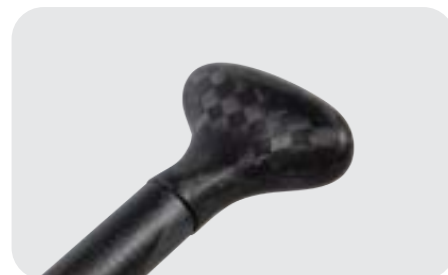

Available on : Carbon Hybrid

Spring Pin

3-piece paddle spring pin and clamp system locks blade in place.

Comes standard with our Hybrid 3-piece paddle

Speedster paddles and Vivaci:
12K lightweight carbon handle / Pro Flex fixed shaft

Carbon Hybrid and Alloy paddles:
Blow molded performance nylon with carbon texture.

SOFT ROOF RACKS

NSP's Soft Roof Racks are perfect for carrying your surf, SUP, or foil boards to the beach on the roof of your car.

The Soft Racks are secured with heavy duty nylon straps that are designed to wrap around the inside of your car while safely securing your boards to the roof. The durable cam buckles keep your boards in place without sliding during transport. The Soft Racks are designed to work on most vehicles.

Available in a Double or Single rack sizing.

Features:

- Single racks hold up to 3 shortboards or 2 longboards.
- Double racks hold up to 6 surfboards
- Universal fit for most cars, trucks, and SUVs
- Thick, long length nylon straps
- Heavy-duty, corrosion-free buckles encased in padded EVA to avoid scratching the vehicle.
- Water-resistant, durable, nylon-wrapped, soft rubber pads.
- Compact size and easy to store.

NSP | REDLINE RESCUE

The Redline Rescue Board by NSP is the gold standard in ocean water safety, engineered with precision to meet the demands of lifeguard teams worldwide. Designed to prevent tragedy, this board has been trusted by professionals across the globe to provide reliable performance when lives are on the line.

For event organisers, lifeguard organisations, and private beach venues, equipping your team with the NSP Redline Rescue Board is not just a choice, it's an investment in proven, life saving technology. Built to endure the harshest conditions, these boards are made to last, standing ready through years of exposure to sun, salt, and sand.

When that critical moment arrives, and every second counts, you can depend on the NSP Redline Rescue Board to deliver the performance and reliability needed to save lives.

Features :

- Air valve
- 8mm soft knee pads
- Poly-reinforced tube handle, covered by nylon webbing all around the board
- Designed-to-spec rescue fin in line with ILS rescue board standards
- Weight approx 12 kg

TECHNOLOGY

1		SLX Carbon technology delivers significant weight savings coupled with excellent durability for top of the line performance.
2		SLX technology delivers wave riding performance and reduced weight without compromising durability.
3	INFLATABLE	All double railed with reinforced double layers on the deck and bottom for durability, rigidity and strength. Traveling with your paddleboard just got easier.
4		Highly durable, reinforced fibers from the flax plant combined with NSP's CocoMat construction helps reduce the use of fiberglass and minimizes the carbon foot-print of our Ecological manufacturing process.
5		Durability, value and performance - the go-to board for any recreational paddler.
6		A longer-lasting construction with rubber bumpers, soft tops and soft bottoms.
7		An all-new durable and ding-resistant technology that represents exceptional value for money. Designed for fleet and rental centers or as an everyday paddler.

TECHNOLOGY

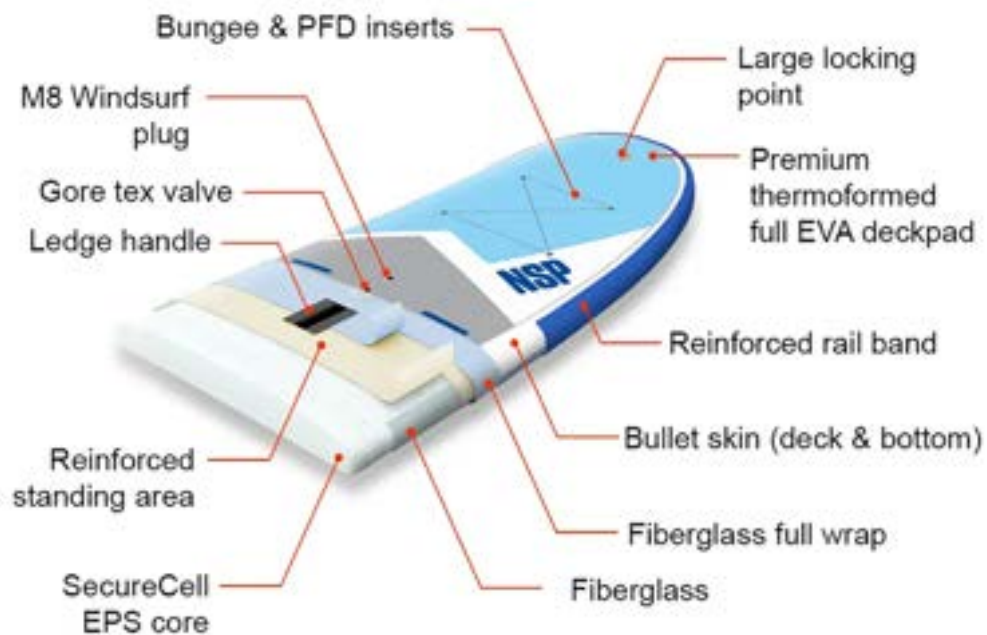

The High Impact Technology (HIT) is the ultimate, worry free fleet board, great for schools, rental centers and personal daily use.

Selling features:

- Eco-friendly SecureCell EPS cores fully wrapped in military-grade fiberglass
- Extremely tough “bullet skin” increases longevity.
- Reinforced rail bands protects against paddle impact.
- Full deck thermoformed EVA for ultimate comfort.
- Ledge handle for easy carrying.
- Oversized locking hole integrated in the nose to secure your board(s) while in storage.
- Bungee cord on the nose.
- M8 screw insert available on all models to attach windsurf mast base.

HIT TECHNOLOGY

CRUISER

ELEMENTS TECHNOLOGY

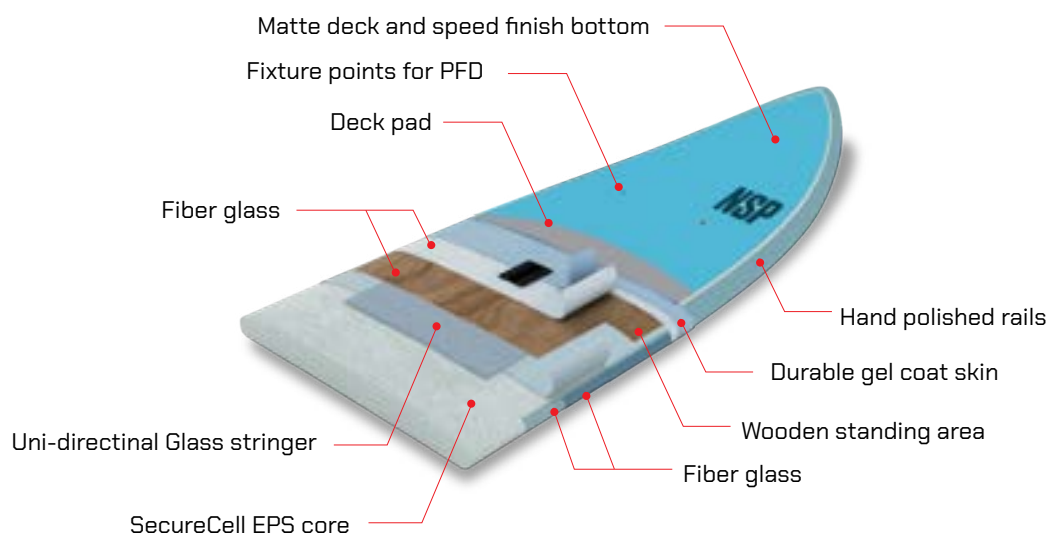

ALLROUNDER

Durability, value and performance – the go-to board for any recreational paddler.

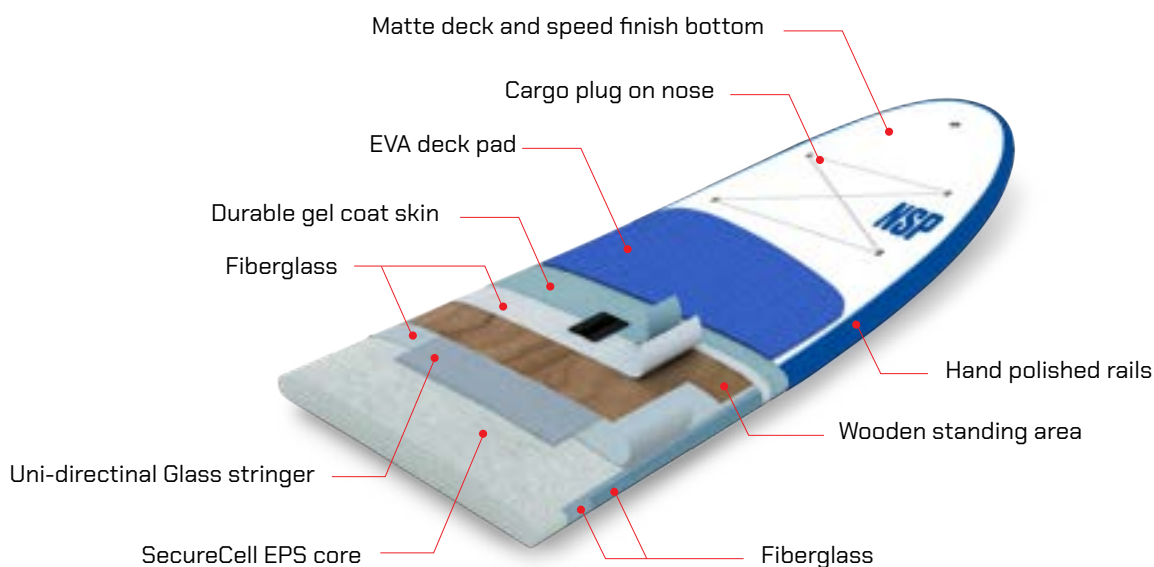

Selling features:

- EPS SecureCell core is wrapped in lightweight fiberglass and molded creating a durable shell.
- The ultimate choice for retailers looking to stock a single SUP range.
- Offers the recreational market proven performance shapes at attractive prices.
- Wide range of construction features, including bio-resin, an Eco-friendly game changer.
- 3/4 Thermoformed EVA deck pad.

Elements

CRUISE

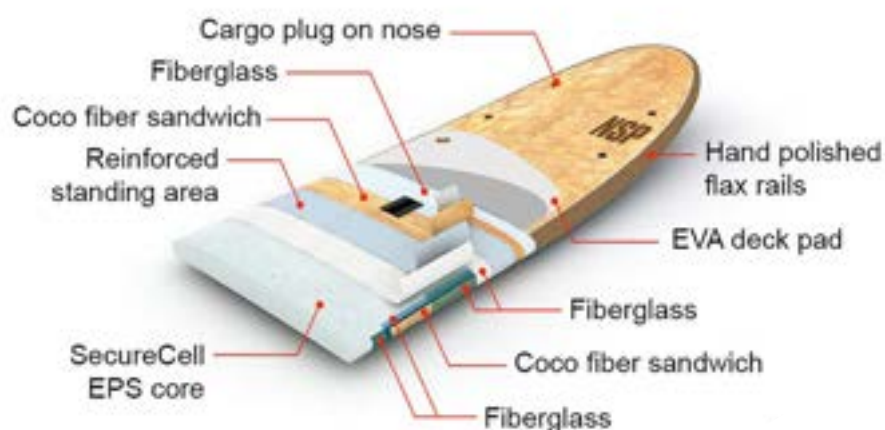

COCO FLAX TECHNOLOGY

ALLROUNDER / CRUISE

NSP flax fiber is a highly-durable, reinforced fiber from the flax plant, helping us to reduce the use of conventional fiberglass in our manufacturing process. This tough little fiber minimizes the carbon footprint of NSP's Ecological manufacturing methods even more.

Selling features:

- Visually appealing with unmatched strength-to-weight ratio.
- Easy to carry because of its weight, easy to maneuver and paddle.
- Responsive flex and considerable strength to handle big conditions.
- Durable flax rails.
- 2019 Paddle Expo "Product of the Year" winner

SLX FLAX TECHNOLOGY

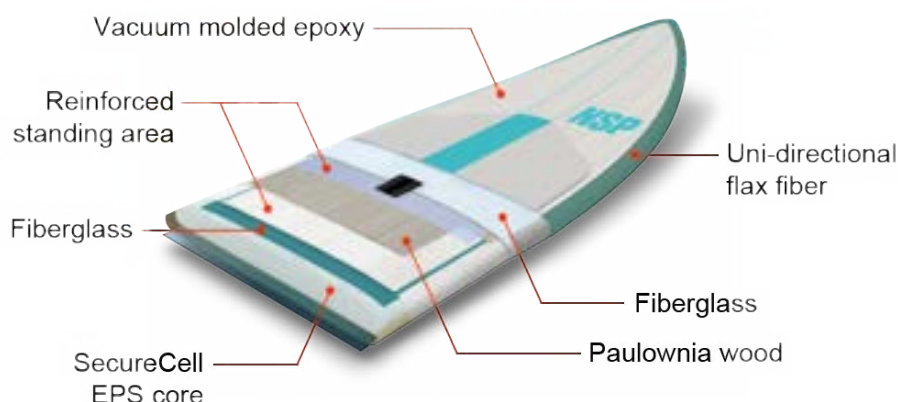

INSTIGATOR / HIGH ROLLER

Our high-performance wave boards are now built even lighter than before, while leveraging more Eco-conscious construction methods. SLX delivers wave-riding performance and a reduced weight without compromising durability. Available in: Instigator High Roller

Selling features:

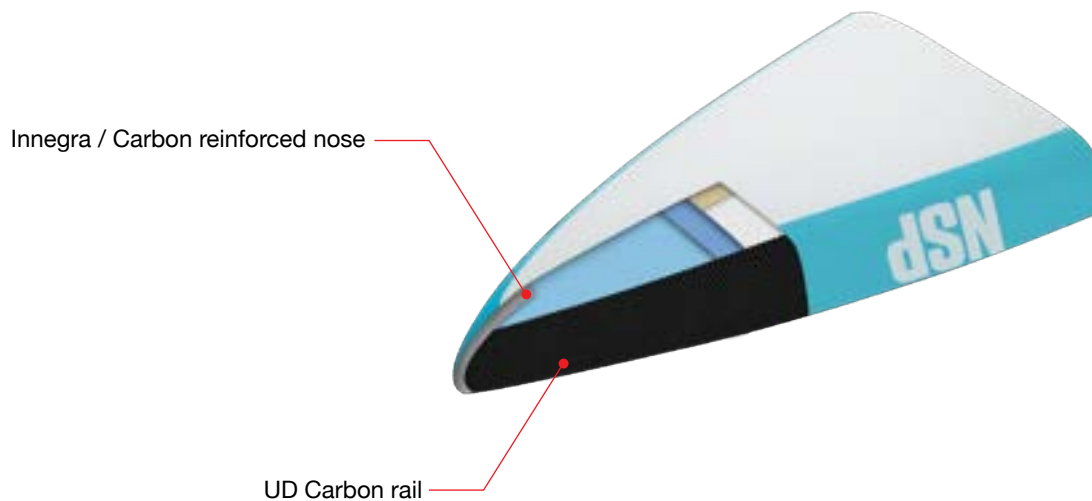

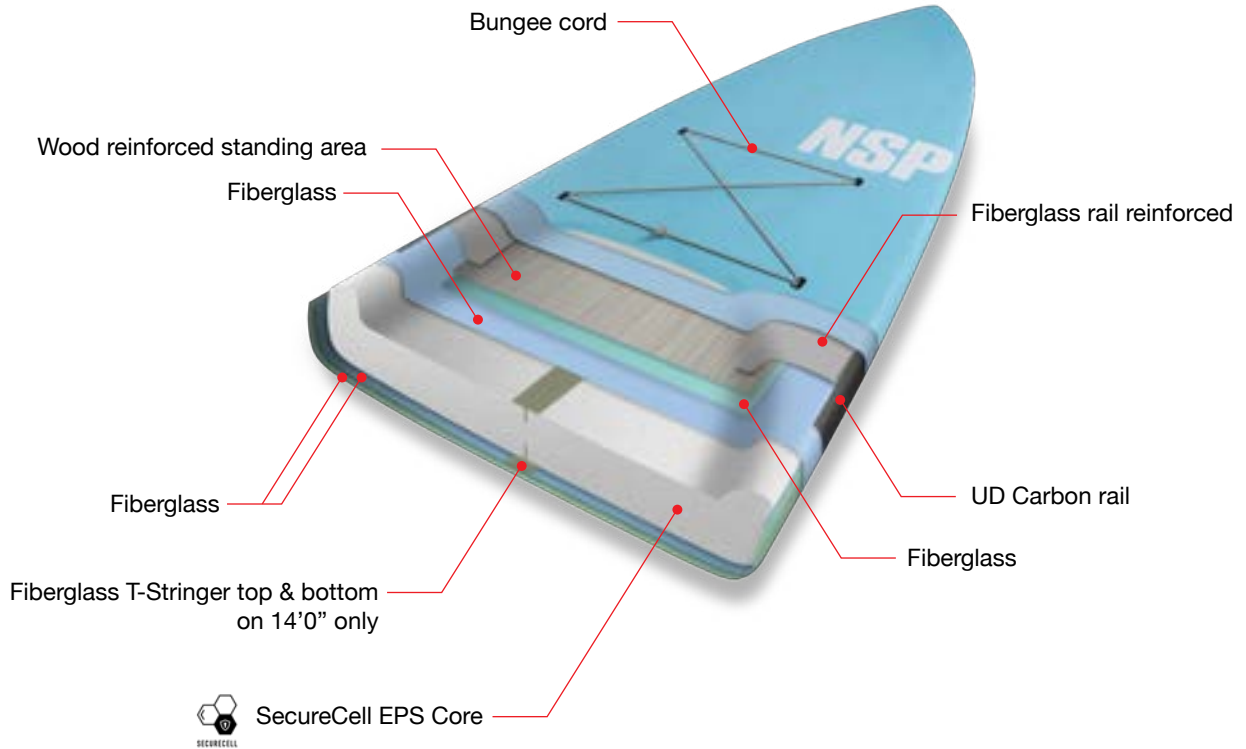

- Vacuum bonded SLX (Super Light Epoxy) core offers a light weight SUP surf option.
- Biaxial glass and Paulownia wood veneer deck for improved impact resistance.
- Uni-directional flax rails for superior flex control and increased durability.
- Eco-friendly option with SecureCell core, bio resin, Paulownia wood veneer and flax rails.
- NSP performance fins included.
- Comes with all-new FTU fin boxes.
- Swallow tail for extra maneuverability.
- 4 speed channels - for extra speed on the wave.

*Specs and construction are subject to change promising durability.

SLX CARBON TECHNOLOGY

OMNI

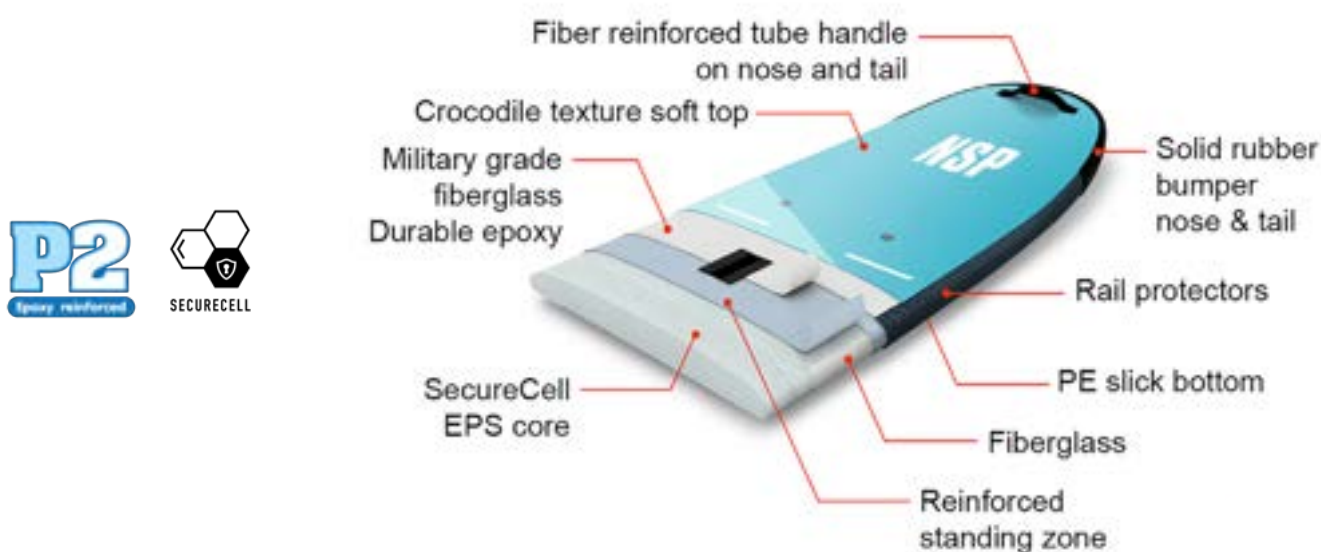

P2 TECHNOLOGY

ALL WATER / ALLROUNDER / CRUISE

Strong, durable and easy to learn on, the P2 Soft boards are great for schools, rental centers and marinas.

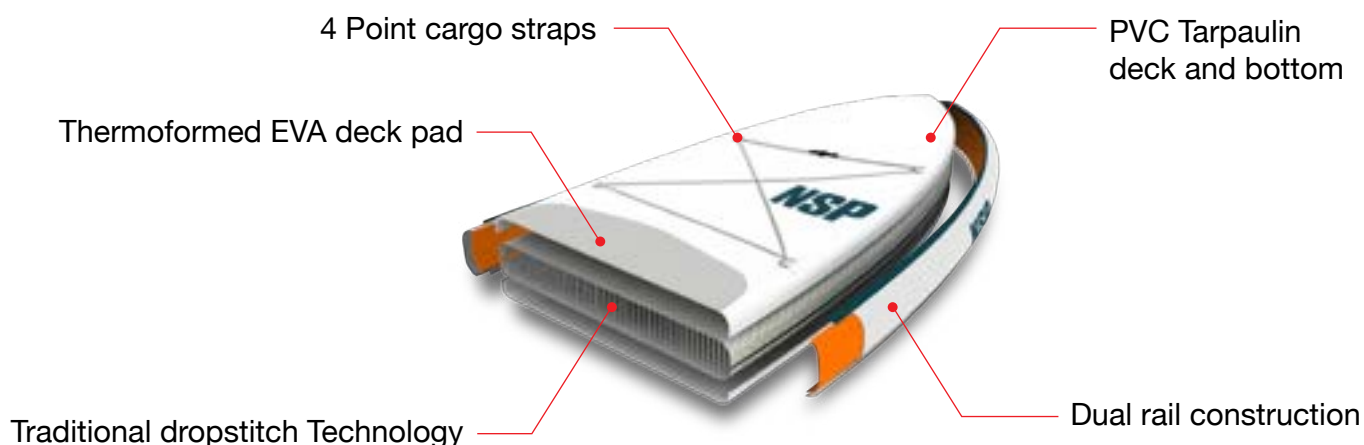

Selling features:

- P2 technology focuses on safety first and ease of teaching.
- The P2 core is NSP's SecureCell EPS, fully glassed in a durable fiber epoxy shell with Eco friendly bio-resin.
- Finished with a soft-top deck with protected rails and slick PE bottom.
- A solid rubber bumper on nose and tail minimizes potential injuries and wear-and-tear, and neoprene handles allow instructors to take control with ease.
- P2 series offers a proven return on investment for surf schools and rental operators worldwide.
- Easy to carry with handles on nose and tail as well as a center ledge handle.
